TB1

LEAD FREE PLUMBING SOLDER

An alloy of tin, copper and silver **TB1** is **THE BEST ONE**, when the job calls for a lead free solder. Contractors report that **TB1** flows like 50/50, reflows faster than other silver bearing solders and has superior capillary action than products from our competition. **TB1** meets and exceeds applicable ANSI and ASTM standards for lead free solders, and is safe and effective for all potable water system applications.

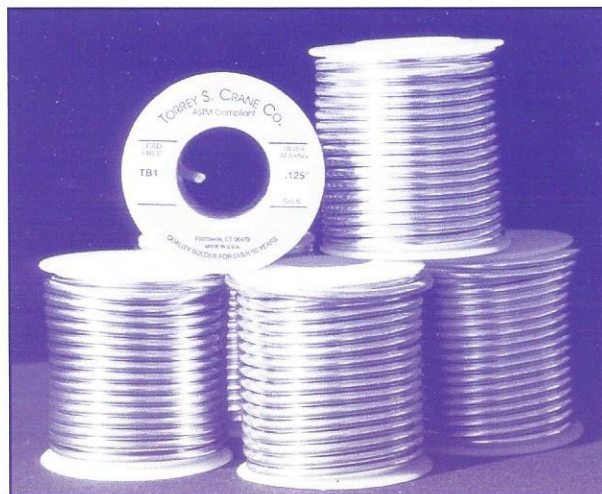

Can you think of a better reason to use lead-free solder? Use the best one, Torrey Crane TB1.

TB1 Physical Properties

Tensile Strength	Liquid State	Solid State
>5,000 PSI	525° F	450° F

Note: TB1 is free of Lead, Cadmium, Antimony, Bismuth, Arsenic & Zinc

ALSO AVAILABLE TB1 CREAM FLUX

- Easy to Use
- Non Toxic
- Water soluble
- Works at room temperature
- Works well with all plumbing solders
